

Grounding function added to the PC board guide rail

Feature

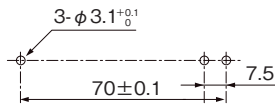

- Contact fingers of the guide sandwiches the PC board so that grounding is achieved from either top or bottom face.
- Spherical profile of the contact area prevents any damage to the PC board pattern.
- Assemble using M3 screws or nylon rivets.

Material

- Plastic portion / Polycarbonate (Black / UL94V-2)
- Metal portion / Phosphor bronze (Sn plating)

Installation specifications

Unit: mm
