

Super-thin surface-conductive film

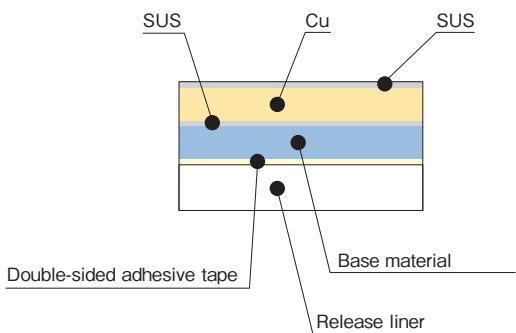

Feature

- Overall thickness 35μm (-FS,-SC)
- Provides high-shielding effectiveness and galvanic corrosion resistance.
- Safer handling compared with metal foil tapes.
- Suitable noise control for flexible cables.

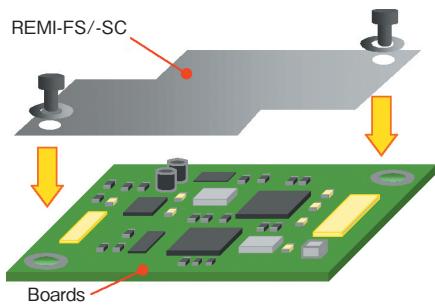

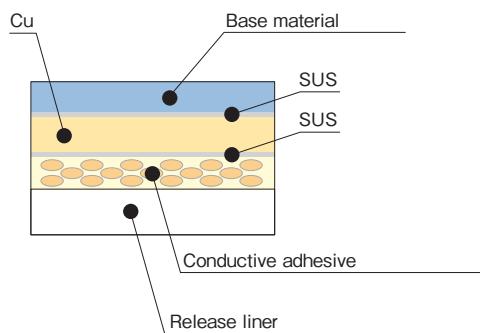

Material

- Base material / PET(-FS,-FA) PPS(-SC,-AC)
- Metal membrane / SUS • Cu

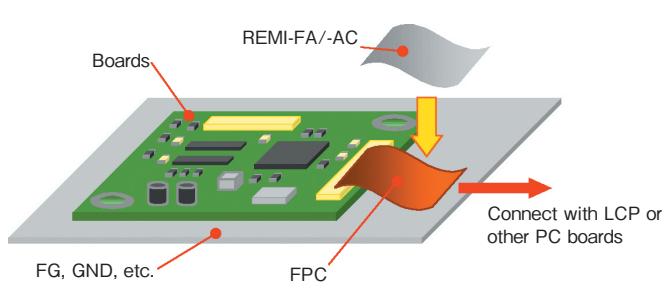

REMI-FS/-SC (Surface conductive type)

REMI-FA/-AC (Adhesive layer conductive type)

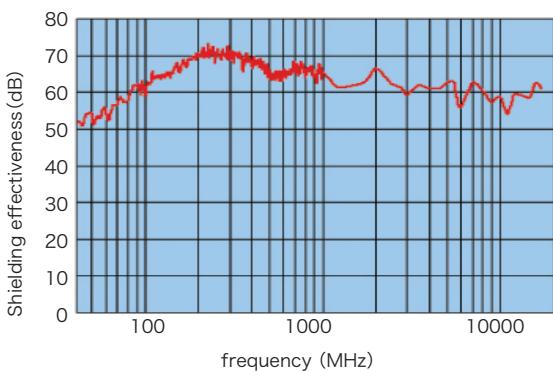

Application example) Shielding small boards using metal membrane face

Application example) Shielding and frame-grounding for FPC

Property

The values are measured data for reference, not guaranteed.
